APM Terminals Earns Top Safety Honors

- Facilities recognized on U.S. East and West Coasts

Los Angeles, California and Elizabeth, New Jersey – APM Terminals Americas recently earned several awards for its achievements in workplace safety at its East and West Coast facilities. Pier 400 (Los Angeles), APM Terminals Oakland and APM Terminals Tacoma were honored by the Pacific Maritime Association, and APM Terminals Port Elizabeth was recognized by the New York Shipping Association.

For the third year in a row, Pier 400-Los Angeles won First Place Safety Award in the Class A Container Group for the Los Angeles/Long Beach areas, as well as First Place Group A Container Companies Coast Award from the Pacific Maritime Association. Also for the third consecutive year, APM Terminals Oakland took top honors in its region with First Place in the Class C Container Group category for Northern California.* In addition, APM Terminals Tacoma was recognized with a Second Place Washington Area and Coast-Level awards for Category C Operators. Because Pier 400 and APM Terminals Oakland each won for three years running, their categories' trophies will be retired and APMT will keep the awards. The PMA will produce new trophies for next year's recipients.

On the East Coast, APM Terminals Port Elizabeth was honored by the New York Shipping Association with an award for Lowest Lost Time Accidents Frequency in the Port of New York and New Jersey. This is third year in a row that the Port Elizabeth facility has earned this distinction.

"Safety is at the core of everything we do and we are very proud of these awards," said Eric Sisco, President of APM Terminals Americas. "Our team has worked hard to create an industry-leading culture of safety at all of our facilities, but our motivation really lies in the commitment we have made to ensure that every colleague, and every person who works on or visits our facilities returns home safely to their family and friends at the end of each day. We will maintain the high standards we have set and continually look for ways to improve."

** APM Terminals withdrew from Oakland at the end of 2009.*

About APM Terminals

– providing the port infrastructure to drive global commerce

APM Terminals operates a Global Terminal Network of 50 terminals with 19,000 employees in 34 countries that provide the port infrastructure essential to international transportation and global economic growth. The company is the independent port operator of the A.P. Moller-Maersk Group. The liner shipping industry, served by APM Terminals and other operators, carries \$4.6 trillion worth of international trade - approximately one third of the total value of global commerce.

The company works closely with the international shipping community and national governments to reduce costs, deliver operational excellence and improve market access worldwide. Access to modern marine infrastructure drives local, regional and international market competitiveness and economic development. In 2007, the global shipping industry provided 4.2 million jobs worldwide, representing compensation of \$27.2 billion, and accounted for \$29.4 billion in capital investment, generating \$183.3 billion to global GDP, according to a recent study commissioned by the World Shipping Council.

For logistics professionals, the Global Terminal Network plays an important role in supply chain management with location, capacity, flexibility and efficiency clearly linked to supply chain success and port-centric logistics.
