- Effective: Exporters may apply or request this promotion from February 11, 2021 until June 30, 2022.

- Requirements: The minimum volumes of the offer will be accounted for annually. That is, in the 12 months following the date of the agreement (between APMTC and the user) to start accounting for the volumes (for example and as a hypothetical case; if the user's request for offer is accepted and it is agreed to start accounting on March 1, 2021, then the accounting will be made until February 28, 2022). For this purpose, users must submit to the commercial area of APMTC the projections of containers to be imported in the annual period indicated above, in order to determine the availability of space at the terminal. If at the end of the annual period, the minimum amounts required for this offer is not achieved, APMTC will charge the extra days following the ten days including in the service package "Integrated Temporary Storage Service" for dry export containers, according to the tariff list (sections 1.4.2.1 and 1.4.2.2) in force at the moment of verification.

- This offer is subject to availability of space determined by APMTC.

1.3 Discount on Integrated Service Price - Dry Cargo Import

- Target group: General users (importers/consignees or its representatives -customs brokers, logistics operators, etc. and other users) of containers with dry import cargo.

- Segment: Users who address dry cargo to APMTC's Temporary Depot.

- Temporary offer: Users of import containers with dry cargo who guarantee minimum amounts equal or more than 600, 1,600 or 3,000 containers using the APMTC's Temporary Depot will be granted a discount on the price of the Integrated Service of Import Temporary Depot (sections 1.4.1.1 and 1.4.1.2 of the Tariff List), according to the table below:

- ≥ 600 to 1,599 containers = USD 20 discount from the price indicated in sections 1.4.1.1 and 1.4.1.2 of the Tariff List
- ≥ 1,600 to 2,999 containers = USD 30 discount from the price indicated in sections 1.4.1.1 and 1.4.1.2 of the Tariff List
- ≥ 3,000 containers = USD 40 discount from the price indicated in sections 1.4.1.1 and 1.4.1.2 of the Tariff List

- Effective: Users may apply or request this promotion from February 11, 2021 until June 30, 2022.

- Requirements:

The minimum volumes of the offer will be accounted for annually. That is, in the 12 months following the date of the agreement (between APMTC and the user) to start accounting for the volumes (for example and as a hypothetical case; if the user's request for offer is accepted and it is agreed to start accounting on March 1, 2021, then the accounting will be made until February 28, 2022). For this purpose, users must submit to the commercial area of APMTC the projections of containers to be imported in the annual period indicated above, in order to determine the availability of space at the terminal.

In the event that the user fails to comply with entering the committed volume of containers into the DT 3014 within 12 months, an additional period of six months may be granted to comply with the committed volume. This additional period will be granted as long as it has been verified that, in the first 12-month accounting period, the user has entered into the DT (3014) 100% of the containers unloaded by the North Terminal.

If, after the end of the twelve (12) months of accounting (or the 18 months in the cases that apply the extension of term), it is verified that the minimum volumes required for these offers have not been reached, APMTC will apply a penalty (the most favourable) to the user. Two types of penalties will be taken into account, but only one penalty will apply and it will be the one that is most favourable to the user. The penalties to be considered are as follows:

Penalty 1: APMTC will charge the prices set out in the "Temporary Deposit" service package for import dry containers, according to the Tariff List (sections 1.4.1.1 and 1.4.1.2) in force at the time of verification. That is, in case of non-compliance, the prices of sections 1.4.1.1 or 1.4.1.2 will be charged on the number of containers that the user has finally entered into the DT 3014.

Penalty 2: The user will pay the amount of the discount on the number of containers missing to reach the target committed to APMTC. For example, if the user accessed the first range of the promotion (from 600 to 1,599 containers) and committed to enter 800 containers - for which he would be entitled to a discount of USD 20 per container -, but within the accounting period only manages to enter 700 containers with which he would have a deficit of 100 containers to reach the commitment of 800 containers, then under this scenario the user will have to pay USD 20 for each of the 100 containers that the user fails to enter to reach the promised target.

For those users who have requested the discount on the previous range of ≥ 1,000 to 1,599 containers (established up to version 9.9 of the Tariff), they will have to comply with the committed volume; for example, if they committed 1,200 containers they will have to enter those 1,200 containers into DT 3014. However, the above terms of six (6) month extension and penalties (specifically penalty 2), which will be effective from May 21, 2021, will apply retroactively for the benefit of these users.

- This offer is subject to availability of space determined by APMTC.

1.4 Discount on Integrated Service Price - Dry Cargo export

- Target group: General users (exporters, forwarders or its representatives -customs brokers, logistics operators, etc. and other users) of containers with dry export cargo.

- Segment: Users who address dry cargo to APMTC's Temporary Depot.

- Temporary offer: Users of export containers with dry cargo who guarantee minimum amounts equal or more than 1,500 containers using the APMTC's Temporary Depot will be granted a discount on the price of the Integrated Service of Export Temporary Depot (sections 1.4.2.1 and 1.4.2.2 of the Tariff List), according to the table below:

- ≥ 700 containers = USD 10 discount from the price indicated in sections 1.4.2.1 and 1.4.2.2 of the Tariff List

- Effective: Users may apply or request this promotion from March 15, 2021 until June 30, 2022.

- Requirements:

The minimum volumes of the offer will be accounted for annually. That is, in the 12 months following the date of the agreement (between APMTC and the user) to start accounting for the volumes (for example and as a hypothetical case; if the user's request for offer is accepted and it is agreed to start accounting on May 1, 2021, then the accounting will be made until April 30, 2022). For this purpose, users must submit to the commercial area of APMTC the projections of containers to be exported in the annual period indicated above, in order to determine the availability of space at the terminal.

In the event that the user fails to comply with entering the committed volume of containers into the DT 3014 within 12 months, an additional period of six months may be granted to comply with the committed volume. This additional period will be granted as long as it has been verified that, in the first 12-month accounting period, the user has entered into the DT (3014) 100% of the containers loaded by the North Terminal.

If, after the end of the twelve (12) months of accounting (or the 18 months in the cases that apply the extension of term), it is verified that the minimum volumes required for this offer has not been reached, APMTC will apply a penalty (the most favourable) to the user. Two types of penalties will be taken into account, but only one penalty will apply and it will be the one that is most favourable to the user. The penalties to be considered are as follows:

Penalty 1: APMTC will charge the prices set out in the "Temporary Deposit" service package for import dry containers, according to the Tariff List (sections 1.4.2.1 and 1.4.2.2) in force at the time of verification. That is, in case of non-compliance, the prices of sections 1.4.2.1 or 1.4.2.2 will be charged on the number of containers that the user has finally entered into the DT 3014.

Penalty 2: The user will pay the amount of the discount on the number of containers missing to reach the target committed to APMTC. For example, if the user committed to enter 700 containers - so he would be entitled to a discount of USD 10 per container -, but in the accounting period only manages to enter 650 containers, which would have a deficit of 50 containers to reach the commitment of 700 containers, then under this scenario the user will have to pay USD 10 for each of the 50 containers he fails to enter to reach the committed target.

For those users who have requested the discount on the previous range of ≥ 1,500 containers (established up to version 9.9 of the Tariff), they will have to comply with the volume committed; for example, if they committed 1,600 containers they will have to enter those 1,600 containers into DT 3014. However, the above terms of six (6) month extension and penalties (specifically penalty 2), which will be effective from May 21, 2021, will apply retroactively for the benefit of these users.

- This offer is subject to availability of space determined by APMTC.

1.5 Discount on price of integrated service - Import/export dry cargo

- Target group: General users (importers/consignees and exporters/forwarders or its representatives -customs brokers, logistics operators, etc.- and other users) of containers with import/export dry cargo. If import containers only are mobilized, the discount on item 1.3 will be granted; and if export containers only are mobilized, the discount on item 1.4 will be granted.

- Segment: Users who address dry cargo to APMTC's Temporary Depot.

- Temporary offer: Users who mobilize import and export dry cargo containers together who guarantee minimum amounts equal or more than 700, 1,600 and 3,000 containers through the APMTC's Temporary Depot will be granted a discount on the price of the Special Integrated Temporary Depot Service for Import and Export Dry Containers (Sections 1.4.1.1, 1.4.1.2, 1.4.2.1 and 1.4.2.2 of the Tariff List), according to the table below:

- ≥ 700 to 1,599 containers = USD 20 discount from the price set out in sections 1.4.1.1 and 1.4.1.2 of the Tariff List for import containers, and USD 10 discount from the price set out in sections 1.4.2.1 and 1.4.2.2 of the Tariff List for export containers
- ≥ 1,600 to 2,999 containers = USD 30 discount from the price set out in sections 1.4.1.1 and 1.4.1.2 of the Tariff List for import containers and USD 10 discount from the price set out in sections 1.4.2.1 and 1.4.2.2 of the Tariff List for export containers
- ≥ 3,000 containers = USD 40 discount from the price set out in sections 1.4.1.1 and 1.4.1.2 of the Tariff List for import containers and USD 10 discount from the price set out in sections 1.4.2.1 and 1.4.2.2 of the Tariff List for export containers

- Effective: Users may apply or request this promotion from October 1, 2021 to June 30, 2022.

- Requirements:

The minimum volumes of the offer will be accounted for annually. That is, in the 12 months following the date of the agreement (between APMTC and the user) to start accounting for the volumes (for example and as a hypothetical case; if the user's request for offer is accepted and it is agreed to start accounting on October 1, 2021, then the accounting will be made until September 30, 2022). For this purpose, users must submit to the commercial area of APMTC the projections of containers to be imported and exported in the annual period indicated above, in order to determine the availability of space at the terminal.

In the event that the user fails to comply with entering the committed volume of containers into the DT 3014 within 12 months, an additional period of six months may be granted to comply with the committed volume. This additional period will be granted as long as it has been verified that, in the first 12-month accounting period, the user has entered into the DT (3014) 100% of the containers loaded and unloaded by the North Terminal.

If, after the end of the twelve (12) months of accounting (or the 18 months in the cases that apply the extension of term), it is verified that the minimum volumes required for this offer has not been reached, APMTC will apply a penalty (the most favourable) to the user. Two types of penalties will be taken into account, but only one penalty will apply and it will be the one that is most favourable to the user. The penalties to be considered are as follows:

Penalty 1: APMTC will charge the prices set out in the "Temporary Deposit" service package for import dry containers according to the Tariff List (sections 1.4.1.1 and 1.4.1.2) or export dry container according to the Tariff List (sections 1.4.2.1 y 1.4.2.2) in force at the time of verification. That is, in case of non-compliance, the prices of sections 1.4.1.1 or 1.4.1.2 will be charged on the number of import containers that the user has finally entered into the DT 3014 and the prices of sections 1.4.2.1 or 1.4.2.2 will be charged on the number of export containers that the user has finally entered into the DT 3014.

Penalty 2: The user will pay the amount of the discount on the number of containers missing to reach the target committed to APMTC. For example, if the user committed to enter 700 containers (400 import and 300 export) - which would give him a discount of USD 20 per import container and USD 10 per export container -, but in the accounting period only manages to enter 650 containers (which in one case could be 375 import and 275 export, and in another case it could be 400 import and 250 export), then there would be a deficit of 50 containers to reach the commitment of 700 containers. Then, under the deficit scenario of the first case (375 import and 275 export), the user will have to pay USD 20 for each of the 25 import containers and USD 10 for each of the 25 export containers that it has missed to enter to reach the committed target. Under the deficit of the second case (400 import and 250 export), the user will have to pay only USD 10 for each of the 50 export containers that it has yet to enter to reach the promised target.

- This offer is subject to availability of space determined by APMTC.
