

APM Terminal Gijón: Containers Maintenance and repair.

“We carry out the according maintenance to the empty equipment for its next load cargo”

The empty ship unloading equipment is maintained to ensure its optimal condition for use in the next load.

“ Maintenance and subsequent repairs of containers within our facilities”

Why choose APM Terminals Gijón?

- ▶ Repair of all types of containers.
- ▶ Updated stock of containers and their current status.
- ▶ Availability of the equipment at the terminal without the need to transfer to another facility.
