ISO units > 20 ft	431 SEK

### Free quayside storage

**Import** units and **storage** units have 3 working days free of Port Storage. Calculation of Import Port Storage time starts from the next day from container discharge and ends when container is gate out from the terminal. Weekend days occurring during the free period are excluded from the calculation but will be charged for after the free period ends.

*Example: If container is discharged on Thursday, port storage will be charged as of Wednesday the week after, i.e. Friday, Monday, and Tuesday are free (first Saturday and Sunday are also free).*

**Export** and **transshipment** units have 5 working days free of Port Storage. Calculation of Port Storage time starts on the day container is gate in to the terminal and ends the day before container is loaded on a vessel. Weekend days occurring during the free period are excluded from the calculation but will be charged for after the free period ends.

*Example: Container is gate in on Tuesday and loaded on Wednesday the week after. Port Storage will be charged for 1 day, i.e. Tuesday the week after gate in. In this case Tuesday, Wednesday, Thursday, Friday and Monday free (first Saturday and Sunday are also free) as well as the day of loading Wednesday is also free.*

Temperature controlled units, units containing dangerous goods, and OOG units have the same free Port Storage terms as described above. *Important:* Additional storage surcharges apply to this type of units as per Port Tariff (see Storage Surcharges).

Following storage tariffs are applicable outside Free time:

#### Storage ISO units

After free period (per unit and calendar day)	day 1-3	day 4-7	day 8-
