# Apple supplier Wistron nears land deal in India

**REUTERS** Mumbai, January 31

APPLE'S TAIWANESE CON-**TRACT** manufacturer Wistron Corp is close to finalising a land deal in Bengaluru and the firm is likely to invest about \$157 million to develop the site, two government officials said.

ICT Service Management Solutions, Wistron's unit that assembles Apple's low-cost iPhone SE in India, has been scouting for some 100 acres in and around Bengaluru, said the sources, who are familiar with the matter but asked not to be named as they are not authorised to publicly discuss the

Apple and Wistron declined requests for comment.

Some of Wistron's global executives and its India head met with the industries minister of Karnataka earlier this month and a deal on the land lease may be struck in a few weeks, said one of the officials.

A Karnataka government body that deals with investment proposals did not immediately respond to requests for comment.

Wistron is likely to use at least a part of this land to set up new assembly lines for Apple, the sources said.

Athird source said Apple was

likely to start assembling its iPhone 6s models in India via Wistron soon, as it looks to cut costs and diversify its production base beyond greater China.

The 6s models, launched more than two years ago, remain popular in emerging markets such as India as they are cheaper versus Apple's newer iPhone 8 and iPhone X devices.

ICT has recently won federal approval to import machinery from China into India which may be used to set up fresh assembly lines for iPhones, the third source added.

The assembly of iPhone SE in Indiawas a pilot to test waters and it is only logical the line would be expanded, a fourth source said, without giving any details.

Local assembly could help Apple save on import taxes, price phones cheaper and potentially widen its customer base in India, one of the world's

fastest growing smartphone markets, from just under 3%

Last month, India raised import taxes on products like mobile phones and TVs, forcing Apple to raise prices for most iPhone models except SE.

The move to make electronic imports more expensive is part of Prime Minister Narendra Modi's 'Make in India' push to shore up local manufacturing and create jobs for millions. Ramping up local assembly

or manufacturing will also help Apple cut escalating labour costs in China, where its biggest contract manufacturer Hon Hai Precision Industry Co, widely known as Foxconn, makes a bulk of iPhones and iPads. Apple has been in talks with

the Indian government for months, seeking tax breaks and incentives to expand operations in the country.

The government has so far made no exceptions for Apple, but a rule easing foreign investment norms earlier this month makes it easier for the Cupertino, California-based company to open its flagship stores in India, analysts say.

India is key to Apple's ambitions for a bigger global market share as smartphone sales have slowed in more mature markets.

## Govt, CAPA differ over domestic air traffic growth forecast

**FE BUREAU** Mumbai, January 31

A DAY AFTER aviation consultancy firm CAPA pegged domestic air traffic growth between 18% and 20% for FY19, indicating crossing of the 150-million passenger mark, minister of state for civil aviation Jayant Sinha on Wednesday put that forecast at

a more modest 15%. Sinha, who addressed the CAPA aviation summit in Mumbai via video conference, said while there is tremendous latent demand for aviation in India, two factors are going to determine what that translates into over the next few years. The

first is how quickly airlines are able to add planes for expansion, and the second is availability of slots at major airports, including Delhi and Mumbai.

While Delhi will soon have its fourth runway operational, Mumbai airport remains the single-biggest bottleneck as far as aviation is concerned. The minister said the Navi Mumbai airport will take four to five years to become operational and this will mean a wait to get that capacity added in the market. "If we add this picture of airports to fuel prices stability, then we are looking at a growth in the range of 15% as opposed to the forecast of 20%," Sinha said.

the domestic air traffic growth forecast for FY19 at 15%

"Even if we continue to grow at 15% with over 800 million passenger trips per

year over 10 years, we should bilaterals." be able to reach a target of a billion trips per year," Sinha said. The entire capacity building and processes of the Indian aviation ministry are targeted towards achieving billion trips a year over a horizon of 10-20 years, he said.

On the issue of bilateral negotiations with foreign governments, Sinha said international capacity is not constrained in India by a lack of negotiations over bilateral rights with other countries, but it is pulled down by constrained airport capacity and also bringing in of the widebody aircraft by airlines. "Slots are an issue, not so much the

CAPA, in its report released on Tuesday, said Indian carriers will add a record of 124-130 aircraft in FY2019.

With Indian budget carriers targeting low-cost, long-haul flights, Sinha said the Indian aviation market needs a model like Scoot and other long-haul budget airlines that can offer comfortable flights at compet itive price points. There is a lot of unlocking to be done in that segment, he said. As India is a very price-sensitive market, if players offer flights to Europe and east Asia at the correct price points, the number of international passengers will sky-rocket.

## 'We are planning international flights for second half of this year'

As Indian carriers IndiGo and SpiceJet embark upon ambitious regional and international expansions, the less expansive Tata Group-promoted Air Vistara says it is well positioned in the market.Its CEO Leslie Thng told Manisha Singhal that it is unfazed by other carriers' expansion.

Considering the ambitious expansion plans of peers and the relatively slower growth

of Vistara, how is it positioned?

First of all I do not agree with the statement; I think Vistara, in the

past three years, has shown that we have been able to win our place in the market, we have grown from zero aircraft to 17 aircraft now and we are going to go further beyond 17 aircraft. I think we have usurped market share from the others, so I think it is not appropriate to say that we have not been able to stand on our own in the market.
